Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Continuously Variable Transmission (CVT) market for 2018-2023.

Automotive Continuously Variable Transmission (CVT) is a transmission that can change seamlessly through an infinite number of effective gear ratios between maximum and minimum values. This contrasts with other mechanical transmissions that offer a fixed number of gear ratios. The flexibility of a CVT allows the input shaft to maintain a constant angular velocity.

In the last several years, Global market of Continuously Variable Transmissions (CVT) developed stable. In 2016, Global (production) Revenue of Continuously Variable Transmissions (CVT) is nearly 16.78 billion USD; the actual production is about 11.55 million units.

Japan is the largest consumption market, with a consumption more than half market share in 2016. Following Japan, North America is the second largest consumption market with the consumption market share of 25%.

Continuously Variable Transmissions (CVT) is widely used in automotive made by Japanese manufacturers. The most proportion of Continuously Variable Transmissions (CVT) is automotive with displacement of 1.5 L - 3 L.

Over the next five years, LPI(LP Information) projects that Automotive Continuously Variable Transmission (CVT) will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
