In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Ignition System market for 2018-2023.

Automotive ignition system is a system for igniting a fuel-air mixture which is used in gasoline vehicles. The goal of ignition system is to ignite the fuel at exactly the right time so that the expanding gases can do the maximum amount of work. If the ignition system fires at the wrong time, power will fall and gas consumption and emissions can increase.

Automotive ignition system comprises of spark plug, ignition coil, and other components.

Demand from the downstream brings a power to the development of automotive ignition system industry. USA and Europe are the major market of automotive ignition system. In recent years, growing China market became an important market of automotive ignition system. Viewed from the supply side, there are many manufacturers in the automotive ignition system industry, while from the demand side, the current demand for automotive ignition system is growing.

At present, there are a mass of manufacturers in the market. Major manufacturers in the market are NGK, Federal-Mogul Corp, Bosch and Denso.

As downstream demand grows and technical barriers become less, there will be a huge market space for automotive ignition system. To grab more market, the little companies have to expand the technology, capital investment and brand influence. To meet the

challenge of little companies and keep their leading stage, leading companies need to increase the technology innovation and speed up the product upgrading. In the future, automotive ignition system market will still be a market of fierce competition.
