The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Powertrain market for 2018-2023.

Automotive powertrain also called the power plant, consists of those parts or components that conduct the vehicle's power from the original source of energy to the surface of the road. In most modern vehicles, the powertrain includes the engine, transmission, drive shaft, differentials and what is known as the final drive.

In automotive terms, the powertrain (also frequently called the 'running gear' in this context), combined with the frame of the vehicle, forms the chassis. When the engine and transmission are removed from the powertrain, the remainder is what the automotive industry commonly refers to as the driveline or drivetrain.

Automotive Powertrain is a system of mechanical parts in a vehicle that first produces energy, then converts it in order to propel it, whether it be an automobile, boat or other machinery. The basic Components it may include are:

Engine

Transmission

Drive Shafts

The concentration degree of Automotive Powertrain market is high with the top 5 manufacturers occupied market share over 60%. The major players in this market are Toyota, General Motors, Ford Motor, Honda, FCA, etc.

Gasoline Powertrain System has the largest share of Automotive Powertrain in USA, and the Diesel Powertrain System is expected to retain the higher growth rate during the next five years due to strong growth in automotive industry. In addition, as people's awareness of environmental protection, the Flex Fuel Powertrain System market share will become increasingly large.

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, investors are still optimistic about this area, the future will still have more new investment enter the field. In the next five years, the consumption volume will keep slow increasing, as well as the consumption value.

Over the next five years, LPI(LP Information) projects that Automotive Powertrain will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
