In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Steel Piston market for 2018-2023.

An automotive piston is a tubular piece of metal that moves up and down inside the cylinder of an engine). The piston generates mechanical energy that provides the necessary power to drive the shaft and consequently the wheels of an automobile. In an engine, the automotive piston primarily functions by transferring force from expanding gas in the cylinder to the crankshaft via piston rod or with the help of a connecting rod. The global average price of Automotive Steel Piston is in the decreasing trend, from 9.5 USD/Unit in 2011 to 8.8 USD/Unit in 2015. With the situation of global economy, prices will be in decreasing trend in the following five years.

According to the bore size, the classification of Automotive Steel Piston includes below 100 MM and above 100 MM, and the production proportion of above 100 MM in 2015 is about 55%.

Europe region is the largest supplier of Automotive Steel Piston, with a production market share nearly 66% in 2015. North America is the second largest supplier of Automotive Steel Piston, enjoying production market share nearly 27% in 2015. From 2017, Federal-Mogul will build a manufacture base in China.

Over the next five years, LPI(LP Information) projects that Automotive Steel Piston will register a 26.4% CAGR in terms of revenue, reach US\$ 620 million by 2023, from US\$ 150 million in 2017.
