## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Automotive Windshield Washer Pumps market for 2018-2023.

Automotive Windshield Washer Pumps are used in almost every passenger and commercial vehicle. They provide clear visibility to the driver by cleaning the windshield and headlamp glasses. The high pressure needed to clean the dust or dirt from the glass is the generated washer. A typical automotive washer pump has a cylindrical structure with a port for connecting hoses. The splash fluid flows through it to reach the nozzle. An inlet port, which is connected to the fluid reservoir, supplies the cleaning fluid to the pump. Almost every automotive washer pump is powered by an electric motor, which is plugged into it individually and gives an output of either 12V or 24V.

China is the largest supplier of Automotive Windshield Washer Pumps, with a production market share nearly 32% in 2017. Europe is the second largest supplier of Automotive Windshield Washer Pumps, enjoying production market share nearly 25% in 2017.

China is the largest consumption place, with a consumption market share nearly 30% in 2017. Following China, Europe is the second largest consumption place with the consumption market share of 22%.

Over the next five years, LPI(LP Information) projects that Automotive Windshield Washer Pumps will register a 2.1% CAGR in terms of revenue, reach US\$ 840 million by 2023, from US\$ 740 million in 2017.
