In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Axle & Propeller Shaft market for 2018-2023. Axle & Shaft is a mechanical part that translates the torque generated by a vehicle's engine into usable motive force to propel the vehicle. Axle & Shaft can be divided into propeller shaft, Rear Axle and Front Axle. The propeller shaft deliver power from an engine/transmission to the other end of the vehicle before it goes to the wheels. It is used on front engine rear wheel drive and most 4 wheel drive vehicles it couples the transmission with the rear differential. There is also a pair of shorter drive shafts often used to carry torque from a transaxle to the wheels. It is used in all kinds of vehicles and the number of half shafts varied with the drive mode.

The Axle & Propeller Shaft industry is relatively concentrated, and high-end products mainly come from North America and Western Europe. In the India wide, major manufactures mainly are GKN, AAL, NTN, Dana, Nexteer, GNA Enterprises, Sona Group, Hyundai-Wia, Talbros Engineering, AAM and etc.

The import and export business of this industry is not frequent. The main reason lies in that many international manufacturers expand their business through building factories or investments in targeted markets. Also, many major players have built up plants in developing countries, like India and Thailand.
