Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Azimuth Thrusters market for 2018-2023. An azimuth thruster is a configuration of marine propellers placed in pods that can be rotated to any horizontal angle (azimuth), making a rudder unnecessary. These give ships better maneuverability than a fixed propeller and rudder system.

At present, the manufactures of Azimuth Thrusters are concentrated in Europe and Japan. Europe is the largest production area in the world, which occupied about 72.89% in 2016. The following areas are Japan, China and the USA. The global leading players in this market are Rolls-Royce, SCHOTTEL Group, Niigata Power Systems , Cat Propulsion, Brunvoll, etc.

Despite the presence of competition problems, due to the increasing demand of leading-edge, effective products, investors are still optimistic about this area, the future will still have more new investment enter the field. In the next five years, the consumption volume will keep increasing, as well as the consumption value.

Over the next five years, LPI(LP Information) projects that Azimuth Thrusters will register a 1.6% CAGR in terms of revenue, reach US\$ 760 million by 2023, from US\$ 690 million in 2017.
