In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global BASE Jumping Equipment market for 2018-2023.

BASE jumping is an air sport, which involves jumping from a fixed structure with the use of a parachute or wingsuit. It is an acronym for the type of structures used to jump from: Buildings, Antennas, Spans (bridges), and Earth (rocks). It is similar to skydiving but more dangerous because of the low altitude jumps involved.

The rising awareness toward long-term mental and physical benefits is main driver to propel the market, customer may suffer from mental disease and become unhappy caused by intense workload. Adventure sport like base jumping is a good method to help loosen up, which may increase the demand of base jumping equipment. One of the major factor hampering the growth of the BASE jumping equipment market is its life threatening and risky nature. BASE jumping is assumed to be more dangerous than sky diving. Owing to increasing mortality rate during base jumping, it is prohibited in many parts across the globe. Another factor that is hindering the growth of the base jumping equipment market is the risk associated with BASE jumping locations. EMEA is expected to witness considerable growth of the BASE jumping equipment market due to the rising number of recreational and professional BASE jumpers in leading countries such as Germany, France, Russia, Norway, the UK, Denmark, Finland, Sweden, Spain, and Italy.

Over the next five years, LPI(LP Information) projects that BASE Jumping Equipment will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
