The anion produced by deprotonation of the alcohol group is known as benzylate or benzyloxide. The worldwide market for benzyl alcohol has been growing at a stable step over the years due to the constant demand rising from many end-use productions. The increasing uses of benzyl alcohol in the paints and coatings, foodstuff and drinks, medical, and personal care industries are expected to continue pouring the call for the same over the prediction period. The Pharmaceutical industry is predicted to be the firmest developing section of the end-user in that prediction period. The substantial rise in the usage of benzyl alcohol in the pharmaceutical industries is likely to push this section over the following years. The use of benzyl alcohol as a preservative and flavoring agent will be one of the major factors that will have a positive impact on this growth of the benzyl alcohol market till 2021.
