The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Beta Pinene market for 2018-2023.

Beta-Pinene (β -pinene) is a monoterpene, an organic compound found in plants. It is one of the two isomers of pinene, the other being α -pinene. It is colorless liquid soluble in alcohol, but not water. It has a woody-green pine-like smell.

Currently, there are many beta pinene producing companies in the world. The main players are Arizona Chemical(Kraton), DRT, IFF, Symrise, Socer Brasil, Sociedad de Resinas Naturales and Sky Dragon Fine-Chem. The global production of beta pinene increases to 123217 MT in 2017 from 96405 MT in 2012.

In consumption market, North America and Europe are the mainly consumption regions due to the bigger demand of downstream applications. In 2016, these two regions occupied 62.40% of the global consumption volume in total.

Beta pinene has different purity, from 80% to 99% content. With advantages of beta pinene, the downstream application industries will need more beta pinene products. So, beta pinene has a huge market potential in the future.

Over the next five years, LPI(LP Information) projects that Beta Pinene will register a 1.3% CAGR in terms of revenue, reach US\$ 300 million by 2023, from US\$ 270 million in 2017.
