## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Big Industrial Ventilation Fan market for 2018-2023.

Big Industrial Ventilation Fans are devices for circulating air and are widely used at condominiums, apartment, restaurants, commercial facilities or factories, workshops, etc. These usually exhaust contaminated, noxious or hot air away from workers or machinery and supply fresh replacement air. These are generally axial flow fans and centrifugal fans that are sometimes used when larger static pressures are required for long duct runs or when higher air velocities are required.

In Saudi Arabia, the consumption volume of Big Industrial Ventilation Fan was 220,298 units in 2015. Centrifugal Fan accounts for 43.68% of the total consumption volume. 15.32% of them were installed in office building, and most of them are with the capacity below 10,000 CFM, which is the similar with that of UAE. But the average capacity is a little lower than that of UAE. Every year about 19% of fans are replaced with new ones. We forecast the consumption volume of Big Industrial Ventilation Fan will reach 312,313 units with CAGR of 5.81% in Saudi Arabia.

In Qatar, the consumption volume of Big Industrial Ventilation Fan was 46,539 units in 2015. Centrifugal Fan accounts for 43.31% of the total consumption volume. 15.28% of them were installed in office building, and the average price of Qatar is the highest in the three countries. Every year about 22% of fans are replaced with new ones. We forecast the consumption volume of Big Industrial Ventilation Fan will reach 63,109 units with CAGR of 5.05%.

Over the next five years, LPI(LP Information) projects that Big Industrial Ventilation Fan will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
