## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Bitters market for 2018-2023.

A bitters is traditionally an alcoholic preparation flavored with botanical matter such that the end result is characterized by a bitter, sour, or bittersweet flavor. Numerous longstanding brands of bitters were originally developed as patent medicines, but are now sold as digestifs and cocktail flavorings.

The top players' success underlines the necessity for bitters to move out of the traditional digestif serve at the end of the meal, indeed it would seem that in the old strongholds in east and Western Europe the category is increasingly under pressure. In short bitters' consumers are ageing and producers must find ways of attracting newcomers to the fold. Exploring alternative occasions and ways of drinking bitters rather than as a digestif has created a nice way out of this bottleneck. Versatility is the name of the game but not all of them have these mixology essentials. A new world is opening up for a beautiful liquid with lots of heritage, authenticity and nice narratives thanks to a growing international cocktail trend.

North America and Europe are the main consumption regions of bitters in the world in the past few years and it will keep the same position in the next few years. The market size of Asia-Pacific region will grow fast in the following years.

Over the next five years, LPI(LP Information) projects that Bitters will register a 4.5% CAGR in terms of revenue, reach US\$ 12700 million by 2023, from US\$ 9790 million in 2017.
