## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Black Pepper market for 2018-2023.

Black Pepper is a strong, hot-tasting, concentrated spice, equipped with dehydrated and crushed peppercorns, utilized to taste the foodstuff. It is similarly recognized as monarch of spices as it comprises ironic anti-oxidants property and additional nutrients. The extraordinary demand for pepper grants a smart marketplace opening for fresh dealers to arrive in the market.

The black pepper market is directly influenced by the growing processed food industry. The rise in consumption of bakery products, confectionery products, and ready-to-eat and fried food in the developed economies is driving the market for the spice. The recent trend of using natural flavor enhancer has also catalyzed the growth of the global market. In the year 2013-15, the global pepper consumption is estimated at around 400,000 tons and has been increasing steadily. Increasing demand from Far East countries, which have started using more pepper in cooking, has been quite significant in driving the global black pepper market. Growth in the cosmetics industry is also directly influencing the pepper market. Due to the antioxidant and antibacterial properties of black pepper, it is often included in skin care products. As stated earlier, that the market is experiencing a major year on year increase in demand for black pepper. But unfortunately, this demand is not backed by adequate supply, which has proved to be a major restraint in this market. This is majorly due to the intensive crop losses in various parts of the world, especially in India & Brazil. Sudden climatic changes and untimely rainfall has significantly led to the fall in the yield of black pepper. Over the next five years, LPI(LP Information) projects that Black Pepper will register a

xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
