## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Bone Cement Mixer Devices market for 2018-2023.

Bone cement plays a vital role in the orthopedic and trauma surgery. It is used to plug gaps between the bones and prosthesis. It also helps support the artificial joints of shoulder, knees, and elbow. The bone cement mixer devices are used for preparing and mixing of bone cement prior to the bone access and infusion procedure.

The growing demand for bone cement in interventional procedures such as vertebroplasty and kyphoplasty will, in turn, drive the adoption of bone cement mixers. For instance, Stryker offers a precision cement delivery system, which includes cement mixers used in vertebroplasty procedures for the treatment of fractures. Also, BD's AVAmax Vertebral Balloon System uses a unipedicular, lateral method to target balloon placement across the midline of the vertebral body. This new system is used to stabilize the fracture and eliminate pain by injecting cement into the vertebra. The system includes a disposable mixer, which mixes the cement within the mixing barrel for consistent cement usage from one procedure to the next.

The demand for automated bone cement mixers is on the rise because of an increased need to reduce procedure time. This will further improve patient compliance, thereby driving the adoption rates. For instance, Stryker offers AutoPlex Cement Delivery System, a fast and easy to use mixer and delivery system. This device automatically mixes the cement, which is ready for delivery in less than one minute. This device also automatically blends and transfers the cement. Exactech offers Cemex System, which features a unique, self-contained system that combines cement powder and liquid into

an enclosed mixing system.

Over the next five years, LPI(LP Information) projects that Bone Cement Mixer Devices will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
