In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Boron Trichloride market for 2018-2023. Boron trichloride is the inorganic compound with the formula BCl_3 . This colorless gas is a valuable reagent in organic synthesis.

Boron trichloride is a highly reactive, corrosive gas that distributors who provide gases to the electronics, pharmaceutical and electronic industries may find increasing demand for as its uses multiply.

First, the global boron trichloride industry is relatively concentrated. Due to the high barriers, (technical barriers) only limited countries are involved in the business. Major manufacturers of boron trichloride are mainly in United States, Europe, Japan and China.

The global production of boron trichloride increases from 4240.8 MT in 2010 to 5643.8 MT in 2015, with an average growth rate of more than 5.89 %. Air Products (Europe and United States) is the world leader, Ube Industries is the leader in Japan, and Ruihe is the leader in China.

Second, The United States production of boron trichloride increases from 1559.5 MT in 2010 to 1975.0 MT in 2015, with an average growth rate of more than 4.84 %. American Gas Group is the United States leader, which holds 27.71% production share of the United States in 2015. Air Products is the United States second largest manufacturer, which holds 25.43% production share of the United States in 2015.

Over the next five years, LPI(LP Information) projects that Boron Trichloride will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
