Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Boxing Equipment market for 2018-2023.

Boxing is currently one of the most popular sports, with the International Boxing Association (AIBA) looking to increase the number of women's boxing events in the Olympic program for the Tokyo 2020 games. In addition to training clubs, the market is also registering several new boxing tournaments, for example, in 2016, the International Championship Boxing League (ICBL) commenced operations and went on to become the world's first competitive league for boxing.

Increasing awareness related to healthy lifestyle has led people to participate in kick boxing, and other self-defensive activities. Surge in kick boxing participation has led to an increase in demand for the kick boxing equipment in the fitness and sports industry. Moreover, people are trying to maintain their health and reduce weight, due to which they are engaging in various fitness related activities. With the increase in participation in fitness activities, demand for the kick boxing equipment is projected to increase in the fitness industry significantly. Such factors are likely to boost growth of the global market of kick boxing equipment during the predicted period. Participation in fitness activities such as kick boxing helps athletes in reducing the prominence of cardiovascular diseases. In order to burn fat and maintain fitness, people follow high-intensity workout routine. Attributed to intense workouts, people regain endorphins that they lose due to surge in stress levels. This helps in lowering prevalence of cardiovascular diseases among professional boxers and athletes. Such factors are projected to fuel growth of the global market of kick boxing equipment throughout 2022.

Over the next five years, LPI(LP Information) projects that Boxing Equipment will

register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Boxing Equipment market by product type, application, key manufacturers and key regions.

To calculate the market size, LP Information considers value and volume generated from the sales of the following segments:
