Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global BPO Business Analytics market for 2018-2023.

Decision makers worldwide are under tremendous pressure to optimize their business operations, acquire new customers, and increase their market share, thereby driving long-term profitability. Business analytics is used for strategic decision making, enabling organizations to understand their customers, optimize operational cost, and improve business efficiency and competitiveness. The demand for regulatory compliance and transparency is high across sectors such as BFSI and healthcare. Enterprises in these sectors need to comply with regulatory norms such as Basel III and Solvency II. Business analytics outsourcing helps enterprises addresses such compliance requirements by increasing their transparency.

The adoption of systems such as ERP, CRM, SCM, and SFA by enterprises and the industrial Internet revolution have led to the generation of large volumes of data. Moreover, with the increased adoption of big data, the use of business analytics has also surged with a greater need to understand data. Data analytics tools and technologies help derive powerful insights and make efficient use of big data. This helps organizations make strategic decisions based on actionable insights for their business activities.

Global BPO business analytics industry is highly fragmented, industry vendors are mostly in the India and USA. The market is extremely competitive with vendors competing to gain a greater market share. Players in the market are constantly looking

for ways to increase their market share through mergers and acquisitions and partnerships. They are also focusing on differentiating themselves by offering mobile-enabled business analytics solutions, predictive analytics, and cloud-based business analytics services. Among them, Accenture is the world leading player in the global BPO business analytics market with the market share of 17.5% in 2015, in terms of revenue.

The BFSI end user segment led the market during 2015, accounting for a market share of more than 23.97%. BFSI organizations worldwide are reaping benefits of business analytics to enhance business productivity and gain competitive advantage. The generation of large volumes of transactional data in this segment is driving the demand for business analytics. Moreover, the growing need to comply with regulatory norms and make them more transparent has propelled the demand for analytics in the BFSI sector. Over the next five years, LPI(LP Information) projects that BPO Business Analytics will register a 14.3% CAGR in terms of revenue, reach US\$ 36900 million by 2023, from US\$ 16500 million in 2017.
