In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Car Brake Pads market for 2018-2023.

This report studies the Car Brake Pads market, Brake Pads are components of brake systems used in automotive and other applications. Brake pads are friction materials which bound to the surface that faces the brake rotor and take the brunt of the frictional force necessary to stop the car. In a disc brake system, the brake pedal activates a hydraulic line which squeezes the calipers against the rotors of the car's tires. Pads are positioned between the calipers and the rotors to absorb the energy and heat, and then provide enough grips to stop the car.

Brake pads are often described as brake linings or brake shoes and when applied to the brake rotors or drums, respectively, with a mix of hydraulic and mechanical force, supply the friction to safely bring the car to a halt. Brake pads are usually used in disc brake setups within a hydraulic brake caliper and are squeezed versus the brake disc, or rotor in order to stop the car when using the brakes. In this report, brake pads, brake linings and brake shoes are in the scope of our statistics.

As we can see from the past few years, the brake pads industry has developed rapidly for many years and the technology is mature. The manufacturers' bases are located all over the world. Some key manufactures have their own brake pads brands, and manufactures brake pads products for the auto maker and the leading brake pad producers as OEM. The key OEM producer includes Federal Mogul, Bosch, ITT Corporation, TRW Automotive, Nisshinbo Group Company etc.

The brake pad sales has increased steadily in the past years and it will keep the tendency in the future few years. And the demand was always stable and increased staley.

The classification of Car Brake Pads includes Non-asbestos Organic Brake Pads, Low Metallic NAO Brake Pads, Semi Metallic Brake Pads, Ceramic Brake Pads, and the proportion of Non-asbestos Organic Brake Pads in 2017 is about 36.03%.

Over the next five years, LPI(LP Information) projects that Car Brake Pads will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
