Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Carbon Monoxide market for 2018-2023. Carbon monoxide is a colorless, odorless, flammable, toxic gas. High-purity carbon monoxide that is dry and free of sulfur compounds is normally noncorrosive to metals at atmospheric pressure. Lower-purity grades containing moisture, sulfur compounds and other impurities can form toxic metal carbonyls and can cause stress corrosion cracking in carbon steels at elevated pressures. Chemically, carbon monoxide is stable but can act as a strong reducing agent at elevated temperatures.

Leading players in Carbon Monoxide industry are Linde, Air Liquide, Praxair and Air Products. Linde is the largest manufacturer, with the production market share of 22.97% in 2016. The top four companies occupied about 62.68% production share of the market in 2016.

Over the next five years, LPI(LP Information) projects that Carbon Monoxide will register a 1.9% CAGR in terms of revenue, reach US\$ 3220 million by 2023, from US\$ 2870 million in 2017.
