Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Catamaran market for 2018-2023.

A catamaran is a multi-hulled watercraft featuring two parallel hulls of equal size. It is a geometry-stabilized craft, deriving its stability from its wide beam, rather than from a ballasted keel as with a monohull sailboat. Being ballast-free and therefore lighter than a monohull, catamarans often have a shallower draft (draught) than comparably-sized monohulls. The two hulls combined also often have a smaller hydrodynamic resistance than comparable monohulls, requiring less propulsive power from either sails or motors. The catamaran's wider stance on the water can reduce both heeling and wave-induced motion, as compared with a monohull.

The consumption volume of catamaran is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of catamaran market might be slightly slow. But it is surely forecasted that the market of catamaran is still promising.

The global sales of catamaran are expected to reach 2399 in 2016, from 1970 in 2011. The average growth is about 4% from 2011 to 2016. Europe occupied 33.06% of the global market in 2015, U.S. took up 28.19%, Japan occupied about 14.96% of global market in 2015, Southeast Asia, China included, together occupied about 10% of the global market in the same year.

Due to the high technology level and market requirements in the developed countries, the market is currently dominated by a handful of companies that own the core technologies, including Sunreef Yachts, Robertson & Caine, and Pedigree Cats and so on.

Over the next five years, LPI(LP Information) projects that Catamaran will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
