In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Caulk market for 2018-2023.

Caulk is a flexible material used to seal air leaks through cracks, gaps, or joints less than 1-quarter-inch wide between stationary building components and materials.

There are various kinds of caulk in the market, such as acrylic latex type, silicone type, butyl rubber type, polyurethane type and so on. Among those types, acrylic type is the widely used one in USA, which accounted for 52.14% market share in 2017.

There are still some difference on caulk and sealant, such as performance, life span and so on. Many companies are producing caulk and sealant together.

Although caulk has a gap with sealant, it is still welcomed by craftsman due to its lower price.
