In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Clean Coal Technology market for 2018-2023. This report studies the Clean Coal Technology market. Clean coal technology is a collection of technologies being developed to attempt to help lessen the environmental impact of coal energy generation and to mitigate worldwide climate change. When coal is used as a fuel source, the gaseous emissions generated by the thermal decomposition of the coal include sulfur dioxide (SO₂), nitrogen oxides (NO_x), mercury, and other chemical byproducts that vary depending on the type of the coal being used. These emissions have been established to have a negative impact on the environment and human health, contributing to acid rain, lung cancer and cardiovascular disease. As a result, clean coal technologies are being developed to remove or reduce pollutant emissions to the atmosphere.

Clean Coal Technology is mainly classified into the following types: Combustion Technology, Gasification Technology and Enabling Technology. Combustion Technology is the most widely used type which takes up about 60.67 % of the total in 2016 in Global

Asia Pacific is expected to be one of the key markets to invest heavily in global clean coal technology market. The implementation of clean coal technology in Asia Pacific has been driven by highly polluted countries such as China and India which are investing in global clean coal technology market to improve plant efficiency and reduce fuel cost. Europe and North America are also heavily reliant on clean coal technology and are expected to register a steady CAGR during the forecast period.

Alstom Power, Siemens AG, General Electric, KBR, Shell, ICCT, etc. are the key suppliers in global market, which have leading technology and market position.

Over the next five years, LPI(LP Information) projects that Clean Coal Technology will register a 2.0% CAGR in terms of revenue, reach US\$ 6730 million by 2023, from US\$ 5970 million in 2017.
