In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Cleaning Robot market for 2018-2023.

A cleaning robot, often called a robovac, is an autonomous robotic vacuum cleaner which has intelligent programming and a limited vacuum cleaning system

The cleaning robot market in APAC is expected to grow at the highest CAGR during the forecast period. Rise in disposable income among consumers in APAC has led to the adoption of cleaning robots. The increasing adoption of cleaning robots and the influx of global players, along with the emergence of native players, are helping the market to grow. As a result, APAC holds a significant share of the overall cleaning robot market. The cleaning robot market for the residential application is expected to grow at the highest CAGR between 2018 and 2023. Cleaning robots in the residential application are utilized to perform tasks such as mopping and cleaning. In certain countries, employing domestic workers becomes too expensive; in such cases, cleaning robots can easily undertake the task of cleaning.

Over the next five years, LPI(LP Information) projects that Cleaning Robot will register a 16.2% CAGR in terms of revenue, reach US\$ 4280 million by 2023, from US\$ 1740 million in 2017.
