Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Cochlear Implant (CI) System market for 2018-2023.

A Cochlear Implant (CI) System is a small, complex electronic device that can help to provide a sense of sound to a person who is profoundly deaf or severely hard-of-hearing. The implant consists of an external portion that sits behind the ear and a second portion that is surgically placed under the skin.

In terms of products type, the market is segmented into unilateral implantation and bilateral implantation. In 2016, unilateral implantation dominated the overall cochlear implant market, accounting for over 97% of global market. The dominance of unilateral implantation is majorly due to a higher demand for the product. Unilateral implantation surgery is conducted at a lower cost as compared to bilateral implant. Bilateral implantation is expected to witness the fastest growth during the forecast period.

Due to the high technical threshold, the concentration of cochlear implants system market is very high. Cochlear from Australia is a giant player in this market, accounting for almost 60% of global market. Other leading companies are MED-EL, Advanced Bionics (Sonova), Oticon (William Demant), Hangzhou Nurotron and Listent Medical.

Over the next five years, LPI(LP Information) projects that Cochlear Implant (CI) System will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
