In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Coffee Creamer market for 2018-2023.

Coffee Creamer, also called coffee whitener, or non-dairy creamer, is a cream substitute used primarily for flavoring coffee and tea. There are a variety of creamers made with various products, but most of the standard or best-known brands contain the protein-rich milk derivative casein in the form of sodium caseinate.

Coffee creamer or coffee whitener has become an increasingly important ingredient used to replace milk powder in white coffee or tea, beverages, culinary and other food preparation. It is more economical, has good shelf life and is easy to handle.

We tend to believe this industry now is mature, and the consumption increasing degree will show a smooth rising curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Coffee Creamer will register a 3.6% CAGR in terms of revenue, reach US\$ 6600 million by 2023, from US\$ 5350 million in 2017.
