In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Collagen Hydrolysate market for 2018-2023. Collagen Hydrolysate, also called collagen peptide or hydrolysed collagen, is a substance with low molecular weight from enzymatic hydrolysis of collagen. Collagen Hydrolysate is a white odorless powder, neutral in taste and easily soluble in cold liquids.

It is more easily digested and has not gelling behavior. The most important properties of Collagen Hydrolysate are its incomparable health and beauty aspects. Collagen Hydrolysate has become a key ingredient for the nutraceutical (functional foods, beverages, dietary supplements) and cosmetic industries.

The technical barriers of collagen hydrolysate are relatively high, and the collagen hydrolysate production concentrated in several companies including Rousselot, Gelita, PB Gelatins, Nitta, Weishardt, Neocell, BHN, NIPPI and others.

Collagen hydrolysate is widely used for production of Cosmetic, food (including Health care products), Medicine, Food and others. In 2016, consumption in food and health care products occupies more than half of collagen hydrolysate amount. As the demand increases rapidly for downstream industries, the demand for collagen hydrolysate will correspondingly increase. The increased consumption of collagen hydrolysate is expected to continue during the remaining years of the forecast period of 2018-2023. Collagen hydrolysate industry will usher in a stable growth space.

In the past few years, the price of collagen hydrolysate gradually decreased and expected the price will not increase with the Production released. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of collagen hydrolysate.

Therefore, to some extent, the companies face the risk of profit decline.

Over the next five years, LPI(LP Information) projects that Collagen Hydrolysate will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
