## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Composite Coatings market for 2018-2023.

The composite coatings, by application, is further segmented into anti-corrosion, UV protection, thermal protection, and others. Composite coatings for the anti-corrosion application comprise a major market share due to their properties such as uniform coating thickness, accuracy, and consistency, and so on. Due to these features, they are utilized in large volumes in industries such as transportation, industrial, and oil & gas.

The major end-use industries in the composite coatings market include transportation, aerospace & defense, oil & gas, industrial, and others. The transportation end-use industry is the fastest-growing segment in the composite coatings market. Composite coatings offer various features including uniform coating thickness, accuracy, stiffness, and consistency in comparison to powder coatings, due to which these are utilized in the transportation, oil & gas, and industrial end-use industries.

Over the next five years, LPI(LP Information) projects that Composite Coatings will register a 7.7% CAGR in terms of revenue, reach US\$ 2040 million by 2023, from US\$ 1310 million in 2017.
