## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Concrete Waterproofing Admixture market for 2018-2023.

Concrete Waterproofing Admixture is a type of integral waterproofing material that can be mixed with concrete mixture, and mainly used in all kinds of anti-permeability concrete engineering.

The concrete waterproofing admixture industry concentration is relatively low; there are over three hundred manufacturers all over the world, but only a few manufacturers dominate the high-end products market, like Kryton, Xypex Chemical, Fosroc, Grace, Hycrete, SIKA, BASF Rheomac, Penetron, Schomburg, Markham Global and IPA Systems etc. which are almost located in USA Canada and Germany and UK. Most of the rest of manufacturers are some small-scale enterprises and produce the low-end products, mainly distributed in the developing regions like Asia and South America etc.

All manufactures in the world are committed to the improvement of product. These several years, some Chinese manufactures were aimed at improving their technology, but their product quality still cannot catch up with the international ones', so they took low-end market in China.

We tend to believe this industry now is close to mature, and the consumption increasing degree will show a smooth curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies, prices gap between different

brands will go narrowing. Similarly, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Concrete Waterproofing Admixture will register a 3.0% CAGR in terms of revenue, reach US\$ 1180 million by 2023, from US\$ 990 million in 2017.
