## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Containerized Solar Generators market for 2018-2023.

This report studies the Containerized Solar Generators market. The key development drivers of the worldwide containerized solar generators market incorporate expanding expense of power delivered by non-renewable energy sources and dropping rate of solar power. Aside from this, vitality created through containerized solar generators is picking up footing because of its non-contaminating component. This is pulling in the consideration of vitality organizations to interface containerized solar generators to the principle control network.

Factors such as increasing cost of electricity produced by conventional fuels and dropping rate of solar power are accentuating the market's growth. Energy companies worldwide are increasingly switching from exhaustible energy resources to renewable resources for power generation. Apart from this, the compactness and scalability features of containerized solar generators along with reliability of continuous power through solar photovoltaic modules even in bad weather are boosting their uptake. The global containerized solar generators market, by geography, has been classified into North America, Asia Pacific, Europe, South America, and the Middle East and Africa. Amongst all, North America is the significant market for containerized solar generators. This is mainly because of increasingly switch from conventional fuels derived energy to solar power in the commercial sector. Asia Pacific holds dominance in terms of growth rate owing to the increasing awareness for clean energy and substantial investment by governments in the region to develop renewable energy.

Over the next five years, LPI(LP Information) projects that Containerized Solar Generators will register a 7.8% CAGR in terms of revenue, reach US\$ 490 million by 2023, from US\$ 320 million in 2017.
