Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Copper market for 2018-2023.

Copper is one of the oldest metals ever used and has been one of the important materials in the development of civilization. Because of its properties, singularly or in combination, of high ductility, malleability, and thermal and electrical conductivity, and its resistance to corrosion, copper has become a major industrial metal, ranking third after iron and aluminum in terms of quantities consumed.

For industry structure analysis, the Copper industry is not concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 12 % of the revenue market. Regionally, Asia-Pacific is the biggest revenue area, also the leader in the whole Copper industry.

Asia-Pacific occupied 74.26% of the sales market in 2016. It is followed by Europe and North America, which respectively account for around 13.44% and 7.99% of the global total industry. Other countries have a smaller amount of sales.

For price trend analysis, a key variable in the performance of Copper producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Although the market competition of Copper is fierce globally, there are many enterprises can obtain considerable profit from the manufacturing and marketing of Copper and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.

Over the next five years, LPI(LP Information) projects that Copper will register a 5.2% CAGR in terms of revenue, reach US\$ 266900 million by 2023, from US\$ 196500

million in 2017.
