The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Corrugated Box Making Machines market for 2018-2023.

Boxes are used for packaging consumer and industrial goods. Packaging is best suited for shipping and transporting various products that are fragile in nature. These boxes are very durable and have high safety standards compared with the other modes of packaging such as cardboard packaging. Boxes handle pressure and can be stacked for easy and economical transportation. These boxes are safe to use as they do not have any sharp edges.

Box packaging are widely used in gift boxes, moon cake boxes, mobile phone box, shoes box, watches, jewelry box, cosmetic box, tea box, wine box, medicine box, etc. A corrugated box making machine is a machine can make box which will provide company with better selection of carton sizes. If they need to make a very small box for tiniest product as well as an extra-large box for a larger item, this machine can handle it. The demand for corrugated boxes in the food and beverage and electronic goods industries is expected to increase during the forecast period because these two industries are the top users of corrugated boxes. Since their invention, corrugated boxes have been mainly used to pack and transport food and beverage products. China and India dominated the corrugated box making machine market in APAC. The demand for corrugated boxes is also expected to increase from other Southeast Asian countries as these consumable products have not reached the maturity stage. With increasing urbanization and growth of the middle-class population, the demand for various products across different industries is expected to grow during the forecast

period.

The corrugated box making machine market in EMEA saw a decline in demand for corrugated boxes in the wake of low crude oil prices, which led to the overall economic slowdown in the Middle East region. The slowdown in the oil and gas industry augmented the slowdown in demand for consumer and industrial products, which in turn, hit the packaging industry in this region. Like EMEA, the Americas witnessed a slow growth in the demand for various products and services owing to the economic slowdown. The packaging industry in the US and Canada showed stagnant growth during the corresponding period.

The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market. Looking to the future years, the slow downward price trend in recent years will maintain. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

Over the next five years, LPI(LP Information) projects that Corrugated Box Making Machines will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
