In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Cyanate Ester Resin market for 2018-2023. Cyanate ester resins are an important class of thermosetting polymers with high glass-transition temperature, low outgassing, and low dielectric constant and loss. These resins are used in a variety of applications such as printed circuit boards, radomes, structural composites for space applications, and adhesives.

Cyanate Ester Resin production market is relatively concentrated. North America and Europe are the major production areas as well as the leading consumption market. However, small players in other areas like China are growing slowly in recent years, and they are seeking ways to enter into the global market.

Raw material cost is the biggest cost section for cyanate ester resin manufacturing. cyanate ester compound, the main direct upstream material, are mostly supplied by Cyanate Ester Resin producer themselves. Huntsman, Lonza, TenCate, Cytec and Hexcel are the leading players in global market, Techia Corporation and Jiangdu Maida Group are key players in China production market.

Price of Cyanate Ester Resin fluctuated obviously in 2012-2017, due to the upward trend of raw material prices and R & D expenditure, the Cyanate Ester Resin price is forecasted to keep a growing trend in next few years.

Over the next five years, LPI(LP Information) projects that Cyanate Ester Resin will register a 6.8% CAGR in terms of revenue, reach US\$ 250 million by 2023, from US\$ 170 million in 2017.
