Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Deep Drawing Machines market for 2018-2023.

Deep drawing is a sheet metal forming process in which a sheet metal blank is radially drawn into a forming die by the mechanical action of a punch. It is thus a shape transformation process with material retention. The flange region (sheet metal in the die shoulder area) experiences a radial drawing stress and a tangential compressive stress due to the material retention property. These compressive stresses (hoop stresses) result in flange wrinkles (wrinkles of the first order). Wrinkles can be prevented by using a blank holder, the function of which is to facilitate controlled material flow into the die radius.

Deep Drawing Machines are devices used for deep drawing, such as hydraulic presses, mechanical presses.

In the coming years there is an increasing demand for Deep Drawing Machines that is expected to drive the market for more advanced Deep Drawing Machines. Growth in government budgets in the principal countries, increasing of transportation fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of Deep Drawing Machines will drive growth in the United States market.

The Deep Drawing Machines industry market is concentrated as the manufacturing technology of Deep Drawing Machines is relatively matures than some high-tech equipment. And some enterprises, like Waterbury Farrels, Schuler AG, Beckwood Press are well-known for the wonderful performance of their Deep Drawing Machines and

related services. Top 3 manufacturers occupied about 44% United States market share in 2017, is remarkable in the Deep Drawing Machines industry because of their market share and technology status of Deep Drawing Machines.

The consumption volume of Deep Drawing Machines is related to downstream industries and United States economy. As there will always be some uncertain in the economy in the following years, the growth rate of Deep Drawing Machines industry may not keep that fast. But it is surely forecasted that the market of Deep Drawing Machines is still promising.

Over the next five years, LPI(LP Information) projects that Deep Drawing Machines will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
