The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Deep Hole Drilling market for 2018-2023. This report studies the Deep Hole Drilling market, from angles of players, regions, product types and end industries, to analyze the status and the future.

A deep hole drilling machine is a metal-cutting machine tool, designed to produce very deep, precision holes into virtually any metal. Deep hole drilling machines enable the performance of specific tools such as BTA and gundrills, to optimize the deep hole drilling process for manufacturers. Machines are engineered to integrate the technology used by these tools, and optimize all aspects of the process, to drill deep holes with accuracy, reliability, and efficiency.

For industry structure analysis, the Deep Hole Drilling industry is relatively fragmented. TBT, Mollart, Kays Engineering, Entrust and GSM are the main manufacturers. The top five manufactures account for about 43.26% of the revenue market. Regionally, Asia-Pacific is the largest consumption area of Deep Hole Drilling, also the leader in the whole Deep Hole Drilling industry.

The United States occupied 24.06% of the market in 2017. It is followed by South America, which respectively have around 4.87% of the total industry. Other regions have a small amount of sales.

For price trend analysis, a key variable in the performance of Deep Hole Drilling producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Over the next five years, LPI(LP Information) projects that Deep Hole Drilling will register a 5.6% CAGR in terms of revenue, reach US\$ 240 million by 2023, from US\$

170 million in 2017.
