The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Diesel Fuel Additives market for 2018-2023. Diesel Fuel Additives are the compounds that added to diesel fuels to improve performance, such as cetane number improvers, metal deactivators, corrosion inhibitors, antioxidants, rust inhibitors, and dispersants. The overall concentration of additives is generally below 0.1%, so that the physical properties of the fuel, such as density, viscosity, and volatility are not changed.

First, the diesel fuel additives industry concentration is high; there are few manufacturers in the world, and high-end products mainly from North America and Europe.

In the world wide, giant manufactures mainly distribute in North America and Europe. North America has a long history and unshakable status in this industry, like Afton and Lubrizol, both have perfect products. As to UK, the Infernum has become a major manufacturer. In Germany, it is BASF that leads the technology development. In China, the manufacturers focus in the two enterprises such as Sinopec and CNPC.

Second, many enterprises have several plants, usually close to aimed consumption market. Asia Pacific is the leader consumption account for about 33% in the world.

Over the next five years, LPI(LP Information) projects that Diesel Fuel Additives will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
