In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Diethyl Carbonate market for 2018-2023.

Diethyl Carbonate is a carbonate ester with the formula $\text{CO}(\text{OCH}_2\text{CH}_3)_2$. Diethyl carbonate is widely applied in the field of medicine, pesticides, battery, and others. Diethyl Carbonate is a high quality solvent and textile auxiliary agent. It has found wide applications as ethylating carbonylating and arbonylethoxylating reagents in organic synthesis. It is also used as solvents of nitro-cotton, cellulose ether, synthetic resin and natural resin in the textile printing and dyeing industry. Diethyl carbonate can make dyeing uniformity and increase fading quality against sunshine; it is a nice solvent of polyamide, polyacrylonitrile and diphenol resin and can improve feel of the textiles and anti-crease quality in the synthetic fiber industry. It is used as paint remover in the paint industry; in the plastic process it is the solvent of plasticizer or can be used as solvent of plasticizer directly or can be used as plasticizer directly.

It is used to prepare the electrolyte in the capacitor battery and lithium battery. In the pharmaceutical industry it is the basis ingredient of hard and is used to synthesize intermediates, etc

Globally, the diethyl carbonate products are mainly used in electrolyte, pharmaceuticals and pesticides, and synthetic fiber and resin fields etc. China is the largest producer and consumer, and Japan is also a very important producer and consumer in 2016. Europe and USA are the important consumption regions, and they two consume more than 35% of global diethyl carbonate products in 2016.

Over the next five years, LPI(LP Information) projects that Diethyl Carbonate will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx

million in 2017.
