Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Digital Banking market for 2018-2023.

This report studies the Digital Banking market. In contrast to the traditional banking business model, Digital Banking is the move to online banking where banking services are delivered over the internet. It has all the same functions as a head office, branch office, online service, bank cards, ATM and point of sale machines.

Digital banking relies on PC or mobile terminals. Digital banking main has the following applications: Retail Digital Banking, SME Digital Banking and Corporate Digital Banking. And SME Digital Banking was the most widely used area which took up about 64.25% of the global total in 2017.

United States is the largest countries of digital banking in the world in the past few years and it will keep increasing in the next few years. United States market took up about 49.7% the global market in 2017, while Europe and China were about 30.80%, 7.12%. Europe countries like Germany, UK and Spain are developing fast, so does India, which is offering service for many banks and other corporations. There are a few vendors developing digital banking in China, such as IT companies Huawei, Sunline are participating the digital banking business, and they may show a rapid development.

Over the next five years, LPI(LP Information) projects that Digital Banking will register a 18.2% CAGR in terms of revenue, reach US\$ 13900 million by 2023, from US\$ 5080 million in 2017.
