## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Diphenylamine market for 2018-2023.

Diphenylamine (DPA) is a solid crystalline organic compound with a floral odor. It can be off-white, tan or possibly brown/amber. The material's color is dependent on the amount and length of exposure to air and light. It is insoluble in water. Diphenylamine is mainly used for synthesizing rubber antioxidant, dye, medicine intermediate, lubricating oil antioxidant and gunpowder stabilizer.

In last century, world production of Diphenylamine has once reached to more than 100 KMT/year. As the increasing concern of DPA in safety and environmental issue, many companies has stope production of Diphenylamine. Currently, there are only four major players locating in 3 continents. Chemtura is the largest supplier of Diphenylamine with production market share of 45.12% in 2016 in terms of volume. Feiya Chemical is the largest player in Asia with production market share of 32.54%. Nantong Xinbang Chemical from China and Duslo from Slovakia are also important regional suppliers. The major raw material of Diphenylamine is Aniline. In the past years, the market of Aniline has been under fierce fluctuation. The price of Diphenylamine also changed in accordance with the manufacturer cost of Aniline.

Rubber Antioxidant and Lubricant Antioxidant are the main application of Diphenylamine, which takes a combined market share of 66.02% in 2016.

Diphenylamine can also be used in Dyes, Pharmaceutical, Gunpowder Stabilizer. The consumption of Diphenylamine is mainly concentrated in China, USA and Europe, where are also major production area of rubber Antioxidant and Lubricant Antioxidant.

Over the next five years, LPI(LP Information) projects that Diphenylamine will register a

xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
