## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Dispersion Machine market for 2018-2023. Dispersing machines are used in all areas of industry where mixing of liquids or liquids with solids is required. A disperser will generate the shear force necessary to rapidly de-lump powders in a liquid. This de-lumping process is called dispersion. A disperser is a high-powered, low volume pump. Considering its substantially higher horsepower per gallon requirement, a disperser is an inefficient mixer.

In the coming years there is an increasing demand for Dispersion Machine in the regions of Europe and Japan that is expected to drive the market for more advanced Dispersion Machine. Growth in government budgets in the principal countries, increasing of medical treatment expenditures, more-intense competition, launches in introducing new products, increasing of spending on daily chemical industry, retrofitting and renovation of old technology will drive growth in Europe and Japan markets. Globally, the Dispersion Machine industry market is not concentrated as the manufacturing technology of Dispersion Machine is relatively matures than some high-tech equipment. And some enterprises, like IKA, Netzsch, Ross, Fluko, etc. are well-known for the wonderful performance of their Dispersion Machine and related services. At the same time, China, occupied 25.22% production market share in 2015, is remarkable in the global Dispersion Machine industry because of their market share and technology status of Dispersion Machine.

The consumption volume of Dispersion Machine is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Dispersion Machine industry may not keep that fast. But it is surely forecasted that the market of Dispersion Machine is still promising.

Over the next five years, LPI(LP Information) projects that Dispersion Machine will register a 2.8% CAGR in terms of revenue, reach US\$ 120 million by 2023, from US\$ 110 million in 2017.

This report presents a comprehensive overview, market shares, and growth opportunities of Dispersion Machine market by product type, application, key manufacturers and key regions.
