## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Domestic Courier, Express, and Parcel market for 2018-2023.

Domestic Courier, Express, and Parcel is a way to make consumers quickly purchase goods through online purchase through logistics. At present, this industry is developing rapidly with the increasing demand for online shopping. Traditionally the focus of CEP companies was to provide services to the B2B sector. CEP services were synonymous with catering to Urgent Orders, High Value Low Volume goods, Time sensitive and Perishable goods. Many companies focused on delivering through CEP companies to cut down on transit times and cater to the rising demand of JIT supplies wherein more frequent but less volume of supplies were required.

To a certain extent, the rise of the CEP Industry is attributed to the failure of the traditional Postal companies to cope with the changing customer responsiveness, not being more market focused and not able to provide faster services. With the market becoming global, the CEP companies expanded into various geographies, through their International services and started capturing more market share.

Over the next five years, LPI (LP Information) projects that Domestic Courier, Express, and Parcel will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.

This report presents a comprehensive overview, market shares and growth opportunities of Domestic Courier, Express, and Parcel market by product type, application, key companies and key regions.
