In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Double Faced Adhesive Tape market for 2018-2023.

Double Faced Adhesive Tape is any pressure-sensitive tape that is coated with adhesive on both sides. It is designed to stick two surfaces together, often in a way which is not visible in the end product, due to it being in between the objects rather than overlaying them. This allows for neater-looking projects and better craftsmanship. The double faced adhesive tape market in the Asia Pacific region is expected to grow at the highest CAGR during the forecast period. The rising demand for double faced adhesive tapes from automotive, building & construction, paper & printings, and electrical & electronics from countries such as India, China, South Korea, Vietnam, Taiwan, and Indonesia is projected to drive the growth of the double faced adhesive tape market in the region. China is expected to lead the demand for double faced adhesive tapes in the Asia Pacific region.
