In this report, LP Information studies the present scenario (with the base year being 2017) and the growth prospects of global Drone Software market for 2018-2023.

Drone software is getting robust, y'all. In fact, in a recent project where engineers planted, tended, and harvested the first crop ever with robots (i.e., no human hand directly touched any part of the process), the software used for all of the robotics—the tractors and other machines needed—was repurposed from drone software.
Drone Software is mainly used for three applications: Construction, Agriculture, Mining and Others. And Construction was the most widely used area which took up about 37.76% of the global total in 2017. and, in the further, Construction application will occupy more share.
North America is the largest consumption countries of Drone Software in the world in the past few years and it will keep leader position in the next few years. North America market took up about 43.57% the global market in 2017, while Europe was about 26.89%.
USA is now the key developers of Drone Software; most companies are in USA. Others are in Europe.
Dronedeploy Inc., 3D Robotics, Airware, Inc., Dreamhammer Inc. and Pix4D are the key suppliers in the global Drone Software market. Top 5 took up about 39% of the global market in 2017.
Over the next five years, LPI(LP Information) projects that Drone Software will register a 38.4% CAGR in terms of revenue, reach US$ 2730 million by 2023, from US$ 390 million in 2017.
