In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global DTH Drill Rig market for 2018-2023.

DTH drill rig, namely down-the-hole drill rig, is a machine equipped with powerful down-the-hole hammers, air compressors, efficient dust suppression, etc., which is designed for high-capacity rock drilling in quarries, opencast mines and construction projects. Since the global economy continues to deteriorate in last two years, the DTH drill rig industry is deeply affected. To the global market, we still optimistic about the DTH drill rig market; the China market still has a certain development space, because various engineering projects in China are tending to mechanization. About the price, the Full hydraulic powered DTH drill rig is expensive than others. The price of product from different manufacturers is very different, Europe and North America product is expensive than Japan and China.

Over the next five years, LPI(LP Information) projects that DTH Drill Rig will register a 0.3% CAGR in terms of revenue, reach US\$ 670 million by 2023, from US\$ 660 million in 2017.
