Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Dyestuff for Textile Fibers market for 2018-2023.

This report studies the dyestuff for textile fibers market, Dyes are the colouring material that colour commodities of our day to day use. Hardly there is any industry where dyes are not used commercially. From Plastic toys to jazzy t-shirt, everywhere there is application of dye. Textile fiber dyestuff means the dyes used in the textile industry, in this report, the statistics data is including all kinds of textile dyes.

Our report focuses the market of dyestuff for textile fibers. The dominance of polyester and cotton in the global markets has decisively shaped the demand for certain types of dyestuffs. On the other hand, the demand for polyamides, acrylics, cellulose and wool was more or less stagnant. In 2016, the Polyester Fibers, Cellulose Acetate Fibers segment is the leading application of dyestuff for textile fibers, took the market share of 55.64%. When it comes to the type, Disperse Dyes accounted for 43.64% of the global dyestuff for textile fibers market, in terms of volume.

Differences in the regional growth rates of textile products too affect demand. The Asian region saw the biggest growth in textile production, followed by North America, Latin America and Western Europe. This suggests the shift in the global textile industry towards Asia. As a result, China leads in dyestuff production both in terms of volumes and value, with a 67.08% share of the global production; the India is next with 11.76% and Europe has around 5.60%.

Due to a greater use of polyester and cottonbased fabrics, there has been a shift towards reactive dyes, used in cottonbased fabrics, and disperse dyes, used in

polyester. These two dyes have been dominant in all the three regional global market, especially Asia.

Over the next five years, LPI(LP Information) projects that Dyestuff for Textile Fibers will register a 2.2% CAGR in terms of revenue, reach US\$ 6230 million by 2023, from US\$ 5490 million in 2017.
