Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Educational Furniture market for 2018-2023. Furniture refers to movable objects intended to support various human activities such as seating (e.g., chairs, stools, and sofas), eating (tables), and sleeping (e.g., beds). Furniture is also used to hold objects at a convenient height for work (as horizontal surfaces above the ground, such as tables and desks), or to store things (e.g., cupboards and shelves). Furniture can be a product of design and is considered a form of decorative art.

In the coming years there is an increasing demand for educational furniture in the regions of Asia Pacific, North America and Europe that is expected to drive the market for more high-quality educational furniture. Growth in government budgets in the principal countries, increasing of education expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of educational furniture will drive growth in North America and Europe markets.

Globally, the educational furniture industry market is very fragmented as the manufacturing technology of educational furniture is relatively matures than some high-tech equipment. And some enterprises, like KI, Steelcase, Herman Miller, Knoll, VS, etc. are well-known for the wonderful performance of their educational furniture and related services. At the same time, Asia Pacific, occupied 42.60% consumption market share in 2016, is remarkable in the global educational furniture industry because of their market share and technology status of educational furniture.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant

impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

Over the next five years, LPI(LP Information) projects that Educational Furniture will register a xx% CAGR in terms of revenue, reach US\$ xx million by 2023, from US\$ xx million in 2017.
