In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electric Fencing market for 2018-2023.

Electric Fencing systems are used to control a wide variety of animals. A typical Electric Fencing is a psychological barrier that keeps farm animals in and wild animals out, even over long distances. The animal will touch the Electric Fencing and become “trained” not to go near the fence.

The classification of Electric Fence includes Permanent Fence and Portable Fence, and the proportion of Permanent Fence in 2017 is about 76.08%, and the proportion is in decreasing trend from 2013 to 2017. Electric Fence is widely used in agriculture, wild animals, pets, security and others. The most proportion of Electric Fence is agriculture. North America is the largest consumption place, with a consumption market share nearly 35.28% in 2017. Following North America, Europe is the second largest consumption place with the consumption market share of 27.68%.
