Under this abstract definition, a variety of types and styles are available to consumers in the market and still developing. This paper follows the mainstream definition and mainly focuses on the Chinese market. Electric Motorcycles & Scooters can be classified as a combination of electric bicycle, electric scooter, electric motorcycle, and so on. The power-assisted electric scooter with pedals is also called electric bicycle in China. Hence, the in this report, the statistics mainly focus on the following several kinds including E-motorcycles, E-bicycles and E-scooters etc.

Electric Motorcycles & Scooters can be classified as a combination of electric scooter, electric motorcycle, and so on. The power-assisted electric scooter with pedals is also called electric bicycle in China, and China is the largest producer of the Electric Motorcycles & Scooters products, about 90% of the global total production is from China in the past years. In the past several years, the global Electric Motorcycles & Scooters market is relatively stable with CAGR of 4.6% from 2013 to 2018. In 2017, the global actual consumption amount of Electric Motorcycles & Scooters was around 17368.3 K Units.

China is the largest sales market of Electric Motorcycles & Scooters in the world in the past few years and it will keep the same position in the next years. China sales volume took up about 80% the global market in 2017, but it has changed a lot in 2018 due to

the saturated demand (means that the demand is relatively rated, but the production increased too fast and began to be oversupply). China sales share dropped to 79% in 2018. At the same time, the export to Europe and USA increased dramatically. Apparently, many Chinese producers of Electric Motorcycles & Scooters are trying their best to look for new growing-market, while Chinese market is in fierce competition and some small players have quitted this business especially in recent years.

Over the next five years, LPI(LP Information) projects that Electric Motorcycles & Scooters will register a 5.0% CAGR in terms of revenue, reach US\$ 7130 million by 2023, from US\$ 5330 million in 2017.
