In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electric Parking Brake market for 2018-2023.

Electric parking brake (EPB) is a substitute of traditional handbrake. Electric parking brake eliminates the need for a parking brake lever or pedal and improves vehicle styling, space management and crashworthiness. It's a lot easier for automakers to design their interiors and to add new features and options.

Europe is the largest supply area of electric parking brake, the production market share of Europe was 35% in 2015. North America is the second supply area with the production market share of 29%.

Europe is the biggest consumption area of electric parking brake, the consumption of Europe was more than 4300 K units in 2015 with the consumption market share of 44%. North America is the second consumption area with the consumption market share of 33% in 2015.

Market competition is not intense. The top 5 manufacturers occupied the global production market share of 80%. TRW, KUSTER, Continental, DURA, AISIN are the leaders of the industry. With the key technologies and patents, they formed the global market channel of the industry.

The electric parking brake is developing in recent years, and it has a huge demand in the future market.

Over the next five years, LPI(LP Information) projects that Electric Parking Brake will register a 17.5% CAGR in terms of revenue, reach US\$ 4340 million by 2023, from US\$ 1650 million in 2017.
