In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electric Vehicle Charger (EVC) market for 2018-2023.

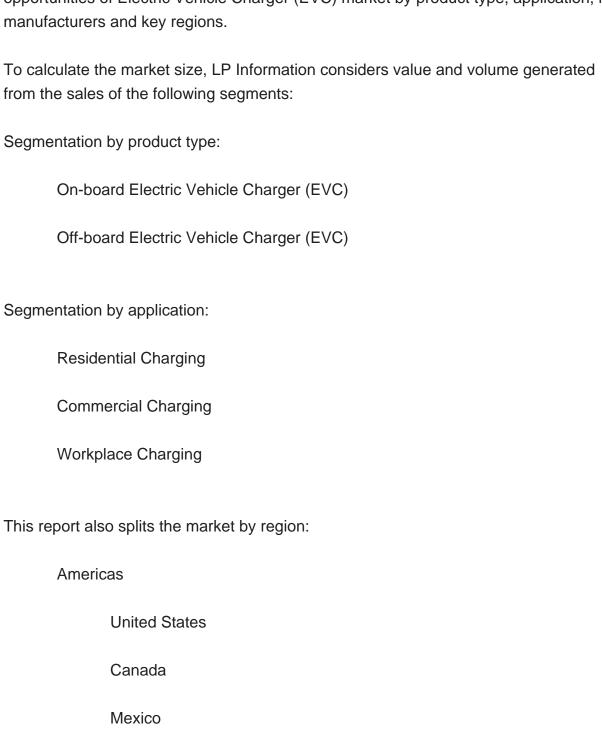

Electric Vehicle Charger (EVC) is a device which converts the alternating current (AC) distributed by electric utilities to the direct current (DC) needed to recharge the battery of electric vehicle. There are a number of different types of battery chargers based on the way they control the charging rate and whether installed on the electric vehicles, such as on-board and off-board Electric Vehicle Charger (EVC). Generally, the former has a small power, while off-board is large and has power more than 30 KW. The global electric vehicle charger (EVC) market developed rapidly in the past five years, now United States, China and Western Europe are dominated the EVC market, especially in China, now has been the largest market of electric vehicle and EVC. In addition, China, United States, India and major European countries have planned to expand the electric vehicle market; this will give a big boost to the EVC market. The major electric vehicle charger (EVC) producers are mainly distributed in United States, UK, France, Ireland, Switzerland, Germany, Portugal and China, like Chargepoint, Leviton, Blink Charging, General Electric, AeroVironment and Clipper Creek are dominating the North America; ABB, Eaton, Schneider Electric, Siemens, IES Synergy, Chargemaster(Elektromotive), Efacec, DBT-CEV and Pod Point are dominating the Europe market.

In future, the global market will be more competitive, and some giants may expand their market market position through mergers and acquisitions, such as Chargemaster purchased Elektromotive in 2017.

Over the next five years, LPI(LP Information) projects that Electric Vehicle Charger (EVC) will register a 22.3% CAGR in terms of revenue, reach US\$ 5990 million by 2023, from US\$ 1790 million in 2017.
