In this report, LP Information covers the present scenario (with the base year being 2017) and the growth prospects of global Electrical Switches market for 2018-2023. In electrical engineering, an electrical switch is an electrical component that can 'make' or 'break' an electrical circuit, interrupting the current or diverting it from one conductor to another. The mechanism of a switch removes or restores the conducting path in a circuit when it is operated. It may be operated manually, for example, a light switch. Legrand, Siemens, Simon and ABB captured the top four revenue share spots in the electrical switches market in 2016. Legrand dominated with 24.34 percent revenue share, followed by Simon with 9.02 percent revenue share and Siemens with 8.60 percent revenue share.

In terms of the classification segment, Traditional Electrical Switches market accounted for over 80.37% of the overall share in 2016, and Smart Electrical Switches accounted for over 19.63%. It is expected that Smart Electrical Switches will account for over 22.58% in 2021.

Over the next five years, LPI(LP Information) projects that Electrical Switches will register a 1.0% CAGR in terms of revenue, reach US\$ 3860 million by 2023, from US\$ 3630 million in 2017.
